FÖRVÄNTADE STUDIERESULTAT

Course participants will:

- Develop their ability to teach their subject matter in English
- Develop insights into the learning processes involved when students are taught in a second language.
- Develop fluency, accuracy and confidence in spoken English.

KURSENS INNEHÅLL

The course consists two main strands:

1. Training in the use of English to give lectures in the participant's subject area. This is achieved through the participant preparing and giving short presentations in the relevant subject area. Feedback on these presentations is then given by the course teacher and the other course participants.
2. Discussion and reflection on the consequences of teaching in English. Here participants read and discuss relevant research articles, and consider various aspects of the teacher's role when teaching in English. There will also be input from a number of international experts in the field.

UNDERVISNING OCH EXAMINATION

The course activities include lectures, workshops and whole and small group discussions both locally and via distance technology. Besides taking part in discussions and giving presentations, course participants will be expected to read articles for each meeting, give feedback on the input of other course participants and write short reflections after each meeting. The feedback and reflections are posted on the course website.

Assessment is based on engagement with the course through participation in synchronous and asynchronous discussions and satisfactory completion of the course assignments.

Three grades can be awarded: pass with distinction, pass and fail.

Kursen bedöms med betygen Underkänd, Godkänd eller Väl godkänd.

BEHÖRIGHETSVILLKOR
